

**"4th International Conference on Stem Cells and Cancer (ICSCC-2013): Proliferation, Differentiation and Apoptosis",
19-22 October 2013, Venue: The Haffkine Institute, Parel, Mumbai, India**

The ICSCC-2013 will cover basic and applied research on proliferation, differentiation and apoptosis of all types of stem cells and cancer cells. There will be presentations on various aspects of cancer research, cancer therapeutics, cancer diagnostics, anti-cancer drugs, molecular markers for cancer and stem cells, hematopoietic stem cells, embryonic stem cells, induced pluripotent stem cells, mesenchymal stem cells, cardiac and neuronal stem cells, epigenetic regulation of cancer and stem cells, cancer stem cells, stem cell therapy, clinical trials on using stem cells for treating human and animal diseases, commercialization of stem cell technologies, application of nanotechnology in stem cells and cancer research, nanomedicine for cancer and allied diseases, and other topics related to stem cells and cancer research & treatment.

This conference is a good platform for Masters/PhD students because, besides the scientific interactions, many of the speakers and delegates from India and abroad also look for PhD students and Postdocs for their research programs. So this will also be a place to interact with them in person and discuss potential study/job opportunities in their labs/departments.
